

# Kindergarten Reading: Playground

Our fathers built this for us! It is a house with two slides. To get to the top of the house, you must climb the green and red ladder. The big slide is from the house and it is so fast! The smaller slide is on the lower level and is slower than the big slide. We love playing on it! We can have races to see who is the fastest. We can see fantastic views from the top of the house. Thanks, father, for building it!

---

This is our climbing pyramid! It is in our school playground. It is one of our favourite things to play! We can climb to the top by using the ropes around the pyramid. Once we get to the top, we can see some fantastic views. We need to be careful because we can fall down. We should not push each other and be careful with our footing. It is so fun to see who is the fastest at climbing!

# Kindergarten Reading: Playground

We love playing on our monkey bars at school! It is red and big. It is a bit different to other ones. We have tires hanging down to help us walk along. We can use the bar instead to make it harder. To get up, we can use either the steps or the hoops. It is easier to use the steps, as you have better footing. The hoops we can sit in as they are big. When playing on the monkey bars we must be careful, as we can fall down. We should not push each other and take our time while crossing.

This is our climbing wall tunnel! It is only for our school and it is very special. It is a triangular pyramid shape, that you can climb on the outside and go through the tunnel in the inside. To climb to the top, we can use the climbing holds to get to the top. There are so many colors!

On the side we have a tire swing! It is so much fun. We sit inside it and go back and forwards. We can't go side to side as we will hit the pole. We must be careful.
