

Kindergarten Reading: Space

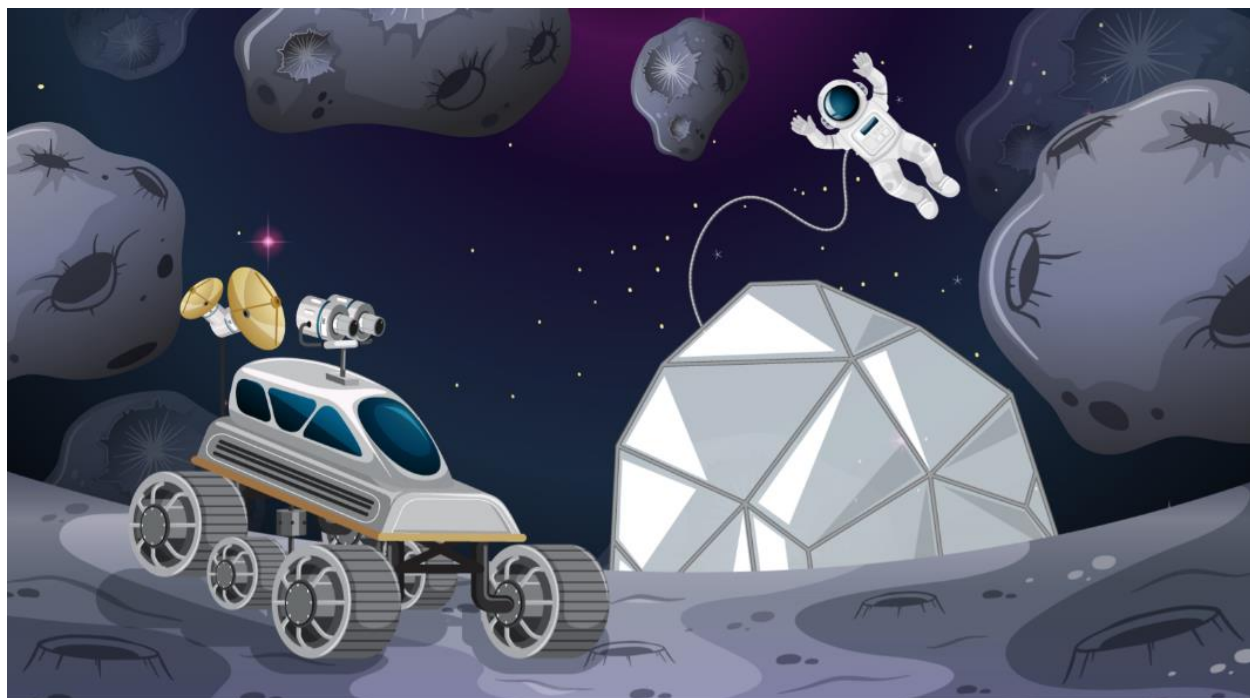

Space is far away. Only a spaceship can get there.

There are many planets, moons, and stars in space.

Astronauts can go into space.
Let's find out more!

Kindergarten Reading: Space

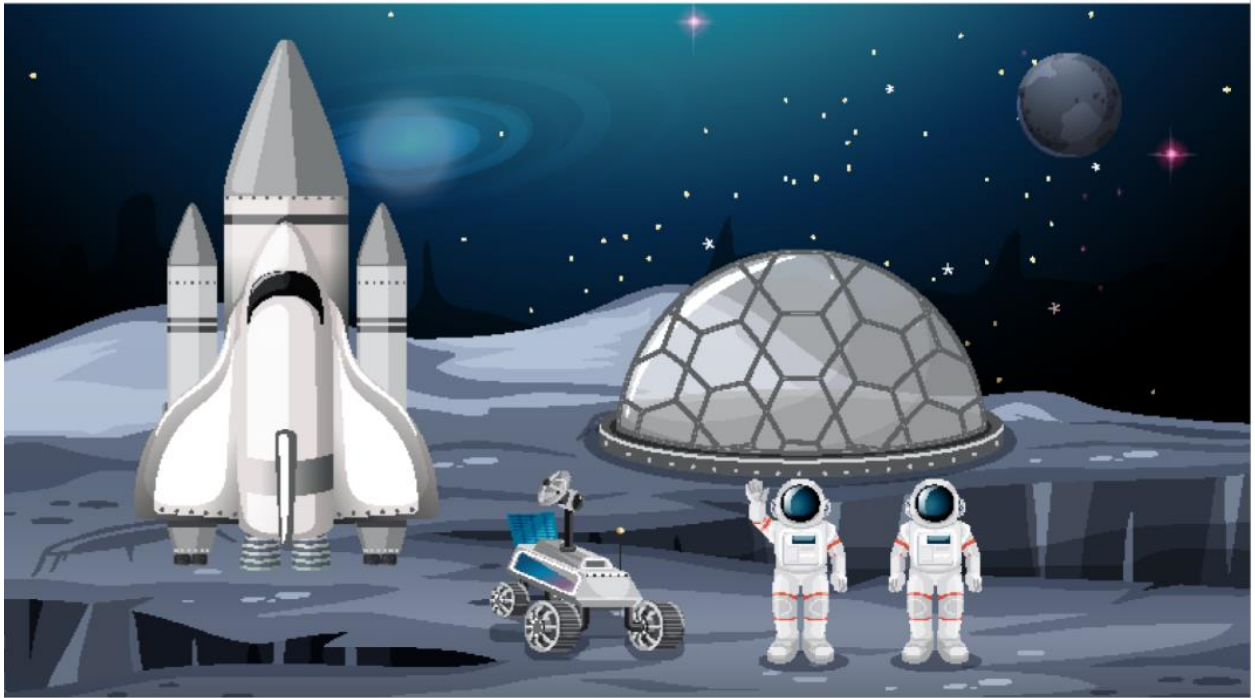

Astronauts can go to the moon.
The first man on the moon was
Neil Armstrong.

The moon has no gravity, so they
need to be careful not to float
away! They can use a moon
buggy to drive on the moon.

Kindergarten Reading: Space

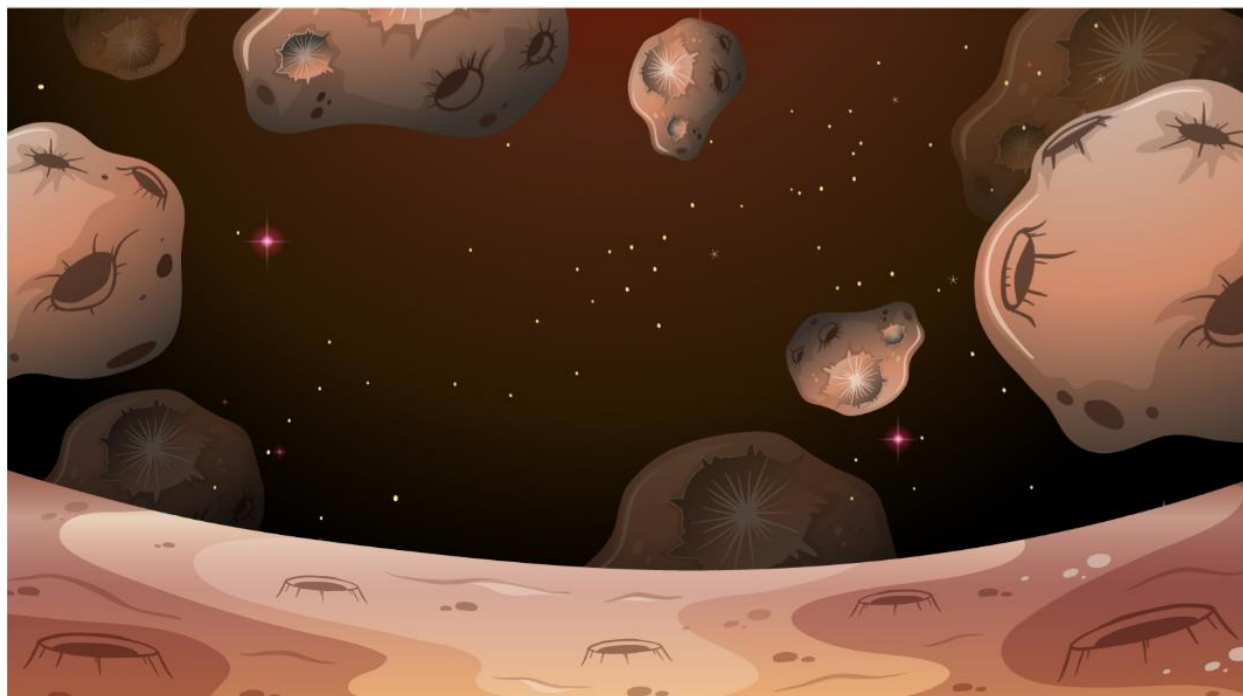

We can use a lunar rover to take pictures on the moon.

In the future, more astronauts will visit the moon. We might even have homes on the moon!

The moon is so interesting.

Kindergarten Reading: Space

There are so many more things in space for us to explore.

There are more planets, moons, and stars that haven't yet seen!

Space is very big. It will take many astronauts to travel the whole of space!
